LEAVE A MARK. NOT A PRODUCT WALKTHROUGH.

Your seven minutes are yours. Focus on one consequential problem and the thinking that makes your company different.

WHAT YOU CAN SHOW

- The problem, urgency and gap
- Your philosophy and distinct approach
- Evidence, cases or deployment lessons
- One brief product moment when it directly illustrates the approach

WHAT THIS IS NOT

- A full product demo or walkthrough
- A feature, pricing or roadmap tour
- A generic company presentation
- Unsupported or confidential claims

Suggested, not mandatory: problem · urgency · gap · philosophy · evidence · one memorable idea. A visible clock runs for seven minutes, followed by seven minutes with the panel. Broader commentary follows the vendor blocks.

THE SHOW

CYBERSECURITY AND AI CONVERSATIONS FOR PEOPLE MAKING CONSEQUENTIAL DECISIONS.

RISK TAKERS

Risk Takers brings founders, CISOs, researchers and builders into direct conversations about what breaks, what works and what responsible action looks like.

HOSTED BY ASAF KATZ

Asaf is the founder and host of Risk Takers and a GTM and AI-growth advisor.

THE SCHEDULE

THE EVENING, END TO END.

Five clear chunks. Five companies. One live conversation that moves from new approaches to panel commentary and results.
